

7 OUTLET ADVANCED POWERSTRIP

Premium quality, fireproof surge protection and reduces vampire / standby power consumption of PC and TV peripherals

OVERVIEW

Advanced PowerStrip (APS) provide premium quality, fireproof surge protection for PC and TV peripherals. They also reduce the amount of standby energy consumed by PC and TV peripherals. Each APS has inbuilt current sensing circuitry with 3 switching thresholds to sense when a Control Device (typically a TV or PC) is On or Off / Standby and to then switch On / Off selected Outlets. Easy to install and provides simple automation to reduce wasteful standby energy consumption. Suitable for residential and workplace applications. TrickleStar Advanced PowerStrip are the product of choice by more than 30 utilities and efficiency programs nationally.

FIREPROOF SURGE PROTECTION

Traditional surge suppression products use standard MOV (Metal Oxide Varistor components). TrickleStar APS' incorporate advanced surge protection technology. The MOVs are encased in a ceramic casing and are capable of suppressing more energy and dissipating heat faster than traditional MOVs. More importantly the ceramic casing is fireproof and is capable of preventing fire during abnormal surge conditions.
